

# Rogue-Ti

# R50T

Rev: Nov 2023

Proudly made  
in the U.S.A.

## Product Specification Sheet

The R50T suppressor stands as the pinnacle solution for .50 BMG rifle users, delivering unparalleled performance for precision shooting. Crafted with Grade 5 & 9 titanium and laser welded together, the R50T strikes the perfect balance between size, strength and weight for large-caliber rifles.

Engineered for precision, the R50T exceeds expectations with its optimized gas flow design. By moving gas away from the bullet, this suppressor not only maximizes accuracy, it drives the gas internally to significantly reduce sound, recoil, and flash, making it a comprehensive solution for those seeking peak performance from their .50 BMG rifles. The R50T features a shrouded end-cap design, further elevating its capabilities to minimize both sound and flash signatures.

The incorporation of a taper-lock muzzle device adds an extra layer of stability, ensuring a secure fit and improving suppressor service life. KGM offers muzzle threads patterns for most popular .50 BMG rifles, and can manufacture customized muzzle device patterns. The R50T is the unparalleled class-leader in .50 BMG and other large-caliber rifles suppressors.

Includes 1-14 pitch Muzzle Device.

### Key Features

- Ⓐ Constructed of titanium and laser-welded for class-leading weight with an extended service life.
- Ⓐ Integrated Gas Flow (IGF) design eliminates over-gassing and reduces toxic gases for the shooter. Internal gas flow maintains precision and minimizes point-of-impact changes.
- Ⓐ Reduced sound, pressure, and tonal variations in firing enhance shooter effectiveness.
- Ⓐ Stoichiometric internal design and a shrouded, integrated gas flow end-cap with flash-hider, achieve superior flash reduction.
- Ⓐ Gas flow design and precision manufacturing enhances rifle precision, minimizing point-of-impact changes.
- Ⓐ Designed to excel with both semi-automatic and bolt-action .50 BMG rifles.
- Ⓐ Multiple thread-pitch options: 7/8-14 (Barrett); 1-14 (Cadex/McMillan/Serbu/Armalite); M24x1mm (AI); M25x1.5mm (Desert Tech)

Not to Scale

Caliber	.50 caliber (.50 BMG)
Construction	Grade 5 & 9 Titanium
Diameter	2.25" (57.15 mm)
OAL (w/o mount)	14" (355.6 mm)
Weight (w/o mount)	46 oz (1,315 g)
Attachment	Radial Muzzle Device 7/8-14; 1-14; M24x1; or M25x1.5
Colors Available	Sniper Grey ■
