

R30A2 Rogue Alpha Suppressor

Product Specification Sheet

Rev: July 2024

The KGM R30A2 is perfect pairing as a forward venting .30 caliber suppressor for modern battle rifles and precision semi-auto sniper rifles. Designed to meet and exceed SOCOM specifications for full-auto firing, enhance host-rifle accuracy, provide superior repeatability, reduce sound and flash, and have minimal impact on a rifle's operating system.

This is achieved by efficiently managing gas flow throughout the suppressor to vent forward and reduce backpressure, which also has the benefit of reducing toxic gases going back to the shooter. By also redirecting the gas flow away from the bullet's flight path, the R30A2 enhances the precision of the host rifle. Simultaneously, the engineered gas flow within the suppressor serves to significantly reduce recoil.

The R20A2 is built to last, consisting of high-quality Inconel and stainless steel components that are laser welded together, ensuring an extended service life, even after enduring years of hard use.

Caliber

7.62 NATO/.30 caliber

Length

6.4" (162 mm)

Width

1.75" (44.5 mm)

Weight (w/o mount)

19 oz (538 g)

Construction

Inconel & Stainless Steel

Muzzle Attachment

QD Flash Hider, 5/8x24

Colors Available

Black

FDE

The R30A2 performs well on any 7.62mm carbine, offering excellent sound and flash reduction on any barrel length.

The R30A2 utilizes the QD Flash Hider, shipping with a 5/8x24 mount. Additional thread pitch flash hiders are available in the following thread pitches:

- 1/2x28
- 3/4x24 Muzzle Index (SR25)
- M15x1 (HK G36)
- M11.5x1 (HK MP7)

Proudly
made in the
U.S.A.
