

SMG9 Submachine Gun Suppressor

Product Specification Sheet

Rev: July 2024

The KGM SMG9 stands as an exceptional submachine gun or PDW (Personal Defense Weapon) suppressor, crafted for hard-use scenarios and capable of handling even full-auto fire with supersonic .300 Blackout ammunition.

Engineered with precision, the SMG9 efficiently manages gas flow to minimize disruption to the host weapon's performance. By redirecting gas away from the bullet's flight path, precision is enhanced, while the engineered gas flow passes through the suppressor to reduce flash, recoil, and sound—ensuring superior accuracy, repeatability, and sound suppression.

Built to endure, the SMG9 boasts high-quality materials and a fully welded construction, guaranteeing an extended service life even under the rigors of years of hard use. The KGM multimount system allows the user to change how the suppressor attaches, with options for a variety of muzzle threads and a 3-lug mount available. Elevate your submachine gun or PDW experience with the reliable and high-performance KGM SMG9 suppressor.

Caliber

9 mm, .300 BLK, .350 Legend

Length

5.6" (142 mm)

Width

1.5" (38 mm)

Weight (w/o mount)

12 oz (340 g)

Construction

Hardened Stainless Steel

Muzzle Attachment

Direct Thread, 1/2x28

Colors Available

Black ■

The SMG9 has an available 3-lug mount for fast-attachment to your favorite submachine gun.

The SMG9 ships with a 1/2x28 direct thread adapter, but additional adapters are available in the following thread pitches:

- 1/2x28
- 1/2x36
- 5/8x24
- M13.5x1 LH

Proudly
made in the
U.S.A.
