

# R30 Rogue Titanium Suppressor

## Product Specification Sheet

Rev: July 2024

The KGM R30 is a lightweight Titanium suppressor that enhances precision, reduce the recoil, and minimize the sound and concussion on your favorite rifle. Whether shooting competitively, hunting, or enjoying recreationally, the R30 will deliver beyond expectations.

Constructed of machined titanium components, laser welded together, and engineered to last tens of thousands of rounds, the R30 will withstand heavy use with even .30 caliber magnum cartridges such as .300 PRC, .300 Win Mag and .300 Norma. Like all KGM suppressors, the gas flow is redirected away from the bullet's flight path to avoid disruptions in precision. At the same time, the gas flow is engineered to reduce flash, recoil, and sound. The Adjustable Port End Cap (APEC) feature allows tuning of external gas flow to help direct muzzle movement during recoil or maximize sound suppression.

The R30 has rear 1.375x24 TPI (HUB) threads for maximum mounting flexibility and are equipped with a titanium 5/8x24 direct thread adapter.

### Caliber

7.62mm/.30 Caliber

### Length

7.3" (185 mm)

### Width

1.75" (44.5 mm)

### Weight (w/o mount)

12 oz (340 g)

### Construction

Titanium

### Muzzle Attachment

Direct Thread Adapter,  
5/8x24

### Colors Available

Sniper Grey ■

The R30 is constructed of lightweight titanium, a material that provides strength without adding significant weight to the end of the barrel.

The R30 has the HUB 1.375x24 threads at the rear of the suppressor, allowing for a variety of attachment options. These suppressors include a titanium direct thread adapter in 5/8x24. Additional direct thread adapters are available in the following thread pitches:

- 1/2x28
- 5/8x24
- 3/4x24 Muzzle Index (SR25)
- 3/4x24

Proudly  
made in the  
U.S.A.
