

R30K & R65K Rogue Titanium Suppressor

Product Specification Sheet

Rev: July 2024

The KGM R30K and R65K are compact and lightweight rifle suppressors that enhance precision, reduce recoil, and minimize sound and concussion on your favorite rifle. This shorter model is well suited to hunting rifles and compact precision rifles, as well as precision gas-guns.

The R30K and R65K are constructed of machined titanium components, laser welded together, and engineered to last for tens of thousands of rounds. These models are uniquely engineered to maximize gas flow in a compact suppressor while ensuring minimal disruption to the rifle's performance by redirecting the gas flow away from the bullet's flight path. At the same time, the gas flow is engineered to reduce flash, recoil, and sound. The Adjustable Port End Cap (APEC) feature allows tuning of external gas flow to help direct muzzle movement during recoil or maximize sound suppression.

Both the R30K and R65K have rear 1.375x24 TPI (HUB) threads for maximum mounting flexibility and are equipped with a titanium 5/8x24 direct thread adapter.

Caliber

7.62mm/.30 Caliber or 6.5mm

Length

5.8" (147 mm)

Width

1.75" (44.5 mm)

Weight (w/o mount)

10 oz (284 g)

Construction

Titanium

Muzzle Attachment

Direct Thread Adapter,
5/8x24

Colors Available

Sniper Grey ■

The R30K & R65K work well on semi-automatic precision rifles, offering reduced backpressure while maintaining exceptional precision in a compact and light package.

The R30K & R65K have HUB 1.375x24 threads at the rear of the suppressor, allowing for a variety of attachment options. These suppressors include a titanium direct thread adapter in 5/8x24. Additional direct thread adapters are available in the following thread pitches:

- 1/2x28
- 5/8x24
- 3/4x24 Muzzle Index (SR25)
- 3/4x24

Proudly
made in the
U.S.A.
