

The KGM Integrally Suppressed Upper Receiver Group (ISURG) is purpose-built for 100% suppressed shooting, excelling in reduced fouling, reduced toxic gases back to the shooter, maximum sound suppression, and reliability.

With efficient gas management, it enhances precision by redirecting gas away from the bullet's flight path, and the gas system is tuned to ensure reliable function with a wide spectrum of ammunition types.

The suppressor is integrated with the gas block, which is pinned to the barrel to achieve a 16.7" overall length barrel, balancing compactness with legal compliance. This upper receiver group is compatible with any AR-15 lower receiver group, and the ISURG is out of the box ready with a full-auto BCG, charging handle and Back-Up Iron Sights (BUIS). The handguard has MLOK slots at the 3, 6, and 9 o'clock positions.

The ISURG is available chambered in 5.56 NATO/.223 Rem and designed to run with a wide variety of ammunition types.

Caliber	5.56mm NATO/ .223 Rem
Upper OAL	23.875" (606 mm)
Upper Weight	5.2 lb (2.35 kg) (w/BUIS)
Suppressor Construction	Hardened Stainless Steel
Barrel Length	16.7" (552 mm) 11.5" rifling
Barrel Twist	1/7
Gas Tube	Carbine
Barrel Finish	Nitride

The ISURG suppressor fits under the handguard, reducing the potential to burn the shooter or gear during extended use.

Proudly made in the U.S.A.
